WITH COMPLEX DESIGNS

DEDICATED
ACCOUNT MANAGEMENT

LASER CUTTING SERVICES

- Superior cutting power, high-speed processing accuracy and fast turnaround
- Complex parts and configurations can be easily processed
- Fully automated storage tower for 24-hour production capacity
- Just-in-time delivery on short and medium runs with no tooling cost

PUNCHING

- Three Amada CNC turret punch presses for a wide range of punching requirements
- Large production orders are easily processed with auto load/unload systems

PRESS BRAKE FORMING

- Precision Amada press brakes deliver consistent production quality through high accuracy components
- Specializing in progressive bending, allowing for processing of multiple customized bends in a single handling to maximize efficiency

ENGINEERING & INSPECTION

- ISO 9001:2015 registered
- Integration of Virtek LaserQC and Keyence CMM technologies to maximize inspection accuracy and speed

WELDING

- Versatile welding team with experience and capability in a variety of alloys and material thicknesses
- Full offering of welding services including MIG, TIG, and spot-welding

HARDWARE INSERTION & VALUE-ADDED ASSEMBLY

- Full range of options from rivet insertion to component assembly
- Experience in gasketing, fan assembly, plastic guides, and post-processing value-added assembly to reduce lead times and streamline supply chain
- In-house testing of electrical and other component functionality

MACHINING SERVICES

- Expert machining capabilities including milling, drilling, threading, and reaming
- Integration of machining services with sheet metal processing allows for one-stop production source

IN-HOUSE FINISHING & PAINTING SERVICES

- Full finishing and painting capabilities including wet paint, powder coat, and silkscreen
- Improved product control and shorter lead times
